Quality Policy

"We are committed to provide a better quality product which suits the customer requirements & keep on improving resource utilization to best of our efforts"

TriMed

ABOUT US

TriMed Technologies was established with a mission to provide our valued clients with impeccable service in the field of advance and update, finest quality hand crafted **E.N.T. SURGICAL INSTRUMENTS**. Along with our team of professionals, we always strive for a "TOTAL QUALITY SERVICE", applied at every stage of manufacturing process which are totally in-house controlled. This resulted in a constant up gradation of the product and consequently, diversification in its range. Moreover, we maintain a good rapport and confidence with leading surgeons / hospitals in India and Asia. Now, we desire to establish and acquire similar confidence / trust from you by fulfilling your requirements of E.N.T. SURGICAL INSTRUMENTS made of STAINLESS STEEL and TITANIUM. We once again ensuring you personalize, efficient, time bound service which is our objective that we at TRIMED strive for.

E

N

T

INSTRUMENTS CARE

Since the E.N.T. surgical instruments are precision in nature, you are requested to follow the undermentioned instructions for maintaining its delicate and finish properties.

CLEANING

Distilled or mineral water should be used to decontaminate & rinsed the instruments. For removal of contaminated stuck on the surface use soft bristled brush or ultrasonic cleaner.

STERILIZATION

Use distilled water in autoclave.

Autoclave should be rust proof from inside otherwise rust may transfer by steam. During dry heat sterilization the temperature should be fully controlled otherwise instrument's hardness may get effected.

STORAGE

Instruments should be fully dried by hair dryer or in oven with temperature at 70°C - 80°C. Medical grade oil can be used on serration, joints, locks, hinges & knurled parts of the instruments.

The company reserve the right to change the shapes/specifications of the instruments without prior notice.

ELECTROSURGICAL UNIT

Owing to our advance and latest technology, we are offering electrosurgical equipment which is versatile; convenient compact device. It is designed with all latest features which is suitable for visiting consultants, clinics, nursing home, hospitals and for all general surgical procedures. This particular unit provides optimum power for general surgical procedures to perform the users satisfaction.

It is a digital display push switch control providing consistent performance for general surgical procedures and delivers optimum and reliable power. Our electrosurgical equipment is extremely convenient for visiting consultants due to compact and lightweight nature of the device.

- Monopolar Handle with cable
- Monopolar twin button Handle with cable
- Reusable Metal plate with cable
- Silicon Rubber plate with cable
- Bipolar Forceps with cable
- Monopolar Electrode 5 Nos
- Double Pedal Foot Switch for Monopolar
- Single Pedal Foot Switch for Bipolar

Input Voltage 180-270VAc
 Current Fuse 5Amps
 Power Consumption 550Max.

Digital display of power with LED Indicator of different modes and push switch control in all modes.

Unit construction As per IEC -60601-1-2&60601-2
 Protection Class I
 Unit Type CF
 Output All floating Output

Measuring Frequency 125KHz
 PPFM pad 5-125
 Non-PPFM pad cond. Not < .10
 AUDIO LEVEL Fix level of audiotone.
 WEIGHT 4.5Kg
 DIMENSION 295x120x285(LxHxW)mm

Portable Type Sterilizer
Micro-Processor Control System

Feature:

- Widerange use: suitable for wrapped/un-wrapped in ophthalmic clinics and hospitals.
- Easy maintenance: sterilizer and the heater is made by stainless steel, so it is easy to keep clean & maintain.
- Sterilization pressure are adjustable from 0.9 to 2.1 kg/cm² (approx. 115 °C-134°C) sterilization time 4 minutes/15 minutes/30 minutes for selection.
- Automatic control from heating up sterilization to time off
- The entire sterilization process is continuously monitored by a micro-processor indications system, which indicate the program working steps.
- Low water level protection system: the electric power will be cut-off, when the water level too low.

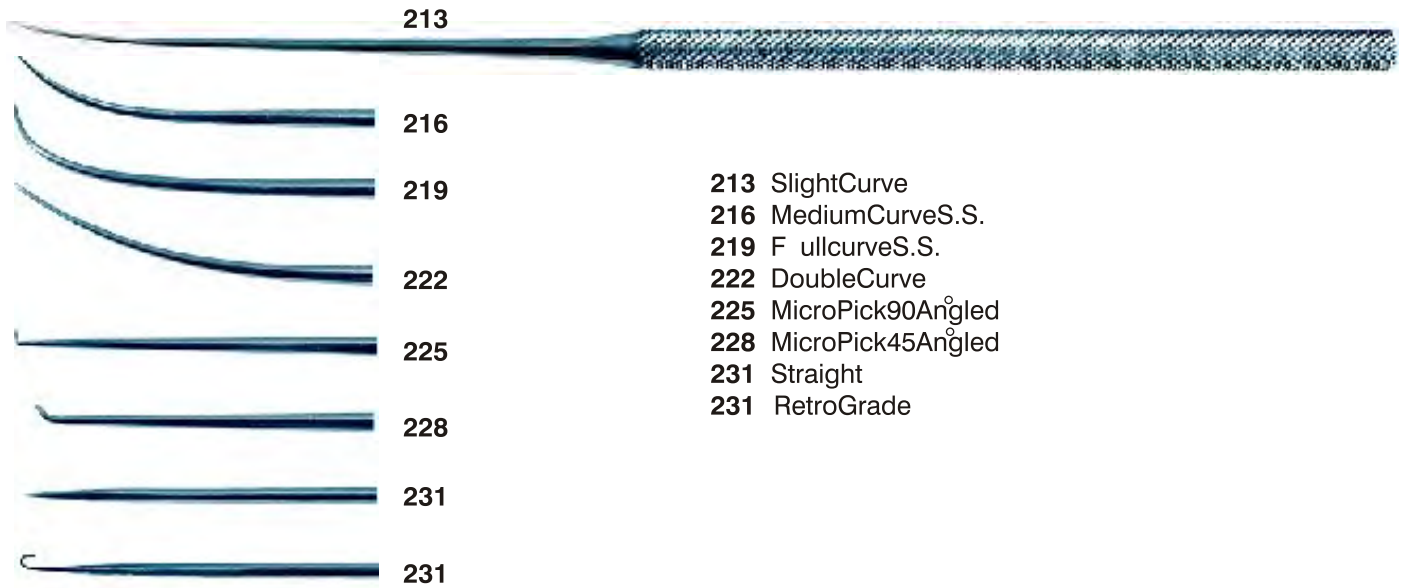

Model No.	SA-232X
Chamber Size	Stainless Steel #304 230mm Øx390mm(D)
Chamber Capacity	Approx. 16Ltrs.
Overall	501(W)x406(H)x537(D)mm
Power Consumption	220V-240V/1.5KW(max.)/6.5A
Using Pressure	#Unwrapped/Wrapped/Liquid
& Temperature	115°C- 134°C/0.9-2.1kg./CM ²
Design Temperature	140°C
Safety Devices	Over Heat (low water) cutoff switch safety valve & release valve emergency exhaust valve, door safety holder pressure control switch
Safety Approval	CE-EMCLVD, approved, CE -MDD approved Chamber designed by ASME/ U.S.A. Standard
Standard Accessories	Stainless steel #304, sterilization box/1 pc. Stainless steel #304 tray/1 pc.

Note:- Also available Model: **230260** with Microprocessor Temperature Controlled System.
