

Skull Clamps and Headrest System

Skull Clamps

The Skull Clamp System is designed to provide multi-functional options for cranial stabilization and fixation. The patient's head is placed in a three-pin the skull clamp which holds the head absolutely still during delicate brain surgery.

TriMed

Skull Clamps and Headrest System

Headrest System

Horseshoe shaped headrest that provides cranial support in the prone or supine position for adults and older children. Vertical and lateral adjustments allow flexibility in patient positioning. Adjustable pad base accommodates various head sizes. Fluid resistant gel pads provide comfort and reduce the incidence of pressure necrosis. Easily cleaned. Pulley Rod attachment for skeletal traction.
